Commercial - \$24.00

**WATER – SEWER -GAS RATES**

Current Utility Rates are attached as Exhibit B:

**Natural Gas Rates**

- All natural gas rates – residential, commercial, industrial, and agricultural – are based on formulas developed by the Municipal Gas Authority of Georgia (MGAG). Each of those rates include four (4) components: (1.) variable cost which includes the cost of gas to the City, (2.) fixed cost which is transportation, demand and fuel charges from the pipeline company, (3.) the City Distribution Charge, and (4.) a Revenue Recovery Fee that is used when gas usage is below forecasted volumes to generate required operating revenues. The City Council sets the City Distribution Charge to pay for the City’s cost of operating the Gas and other departments. The Revenue Recovery Fee is set based on the recommendations of MGAG.
